

# ADVANCED CLAY PAVER PRESENTATION

DALE PAYDEN

PINE HALL BRICK

This presentation is designed for professional hardscape installers, landscape architects, architects/specifiers and engineers. It will cover the benefits of clay pavers and what differentiates one clay paver from another. There will be a discussion of the manufacturing process and the ASTM C902 standard governing clay paving. It will also cover some design opportunities and common concerns such as joint sand retention and efflorescence. Throughout the presentation there will be a discussion of the misconceptions of clay pavers.

Please join us to further your knowledge of clay pavers and how they can be used in your next project. This presentation qualifies for 1 hr. AIA/CES credit.

When:

Thursday, February 12<sup>th</sup>, 2010  
11:00 am – 1:00pm

Location:

To be decided based on the response.  
Phone: (802) 264-1088

Please feel free to bring your clients and colleagues.

Lunch will be provided.

Please R.S.V.P. by 2/3/2010.

Please call (802) 264-1088 or email [dburton@troweltradessupply.com](mailto:dburton@troweltradessupply.com) with any questions.
