

NEW CONCEPT DRYWALL CORNER TAPE

This product is used on drywall angles to provide straight corners and angles every time with controlled flexibility. Same high-tech material as original STRAIT-FLEX in a thinner

#202092

NO COAT - ULTRAFLEX

- Patented bonded face paper, plastic, and joint tape construction
- Provides a structural corner for inside and outside applications
- Keeps corners perfectly straight, even on long runs
- Product strength allows for the spanning of large gaps in framing or drywall
- Finished face paper is ready for paint or texture, minimal finishing required
- Simply the best product for any corner solution

#202101

Strait – Flex (Original)

Ideal for Vaulted ceilings and bay windows great for 90 degree inside and outside corners.

Produces straight, tough, and professional corners. Installs using standard compounds.

ZOOMA – FLEX

- High strength tapered copolymer core
- Surface: Tight fibered, latex saturated paperboard
- Back: Joint tape paper for uniform surface bonding
- Memory free adjustable hinge
